

First Strike MICRO COAT

ANNUAL TREATMENT Prevents Evaporator Coil Buildup

Continually Clean Coils

First Strike Micro Coat creates a water-sheeting barrier to stop dirt from sticking and protect your coils longer.

Protection Benefits

Less Buildup

Water-sheeting barrier repels dirt, grime, and airborne particles that normally stick to coils.

Lower Energy Costs

Maintains airflow and system efficiency with cleaner coils.

Fewer Callbacks

Reduces maintenance needs throughout the year. Clean efficient coils prevent complaints.

Annual Protection

One application lasts all year, reducing the number of annual cleanings, extending the life of the coil.

Don't Let Buildup Win

First Strike forms a molecular shield on evaporator coils, creating a smooth, water-shedding surface. This low-friction coating keeps coils cleaner longer, helping reduce maintenance frequency, support better air quality, and extend HVAC lifespan.
